

What roles do you feel we need in this project?
(Once again, no right or wrong answer. Be as out there as you would like to be!)

UX and
UI
Designer

Software
Testers

Report
author

Big picture
framework -
bring
everything
together

Front-end
development

User
analysar

Back-end
Developer

Agile
processes,
which we will
learn about/
Scrum master

Git
geniuses

Mental
health
supervisor

Presenter

Ideas
person/someone
with a vision

Real world
application
/relevancy

Site
architect

Before moving on, let's narrow down on the roles

What CS skills would you like to improve?

Stanni

Problem
Solving,
Back-end
coding skills.

Wenda

Back-end
developing

Data analysis

Jessica

- Databases/data analysis,
but also happy to fit in
wherever's needed most

Emily

Understanding of
programming languages

Data analysis too (like
Wenda)

Data visualisation

Hamza

- Incorporating 3D
elements from 2D
information
- Back end web
developing

What are your top 5 skills?

(It's okay if you feel they are completely unrelated to this project!)

Stanni

Communications,
speaking on
projects and
presenting

Front end
development,
some
elements of
design

Project
management
and
leadership

Data Handling
and analysis,
from a
background in
Econometrics

Some desire to
learn more of
the backend, so
more general
coding skills

Wenda

Bring up
questions

Data
research
& integration

Communication

kind of
good at
C

evaluation
& assessment

Jessica

Communication

Organisation

Analytical
skills/analysing
problems

Time
management

admin

Management

Research

Problem
solving

Organisation
& Planning

Evaluati
on/repo
rting

Hamza

Creative
design

Linking
abstract and
technical
aspects

Remaining
calm during
the final
minutes...

Understanding
the User and
the Problem

Graphics
design
miro

Given your skillset, what role would you best fit into?

Stanni

Front-End
/UI/UX/
Back-end

Wenda

Scrum
Back
end/Database
UX/UI design

Jessica

Database
Product
UX/UI design

Emily

Quality Assurance
Back end
Product Owner
UI/UX design
Front end

Hamza

- UX/ UI Design
- Product Owner
- Back-end
- QA

ROLES

- 1) Product Owner
- 2) Scrum Master
- 3) Front End
- 4) Back End
- 5) UX design
- 6) UI Design
- 7) Database Administrator (backend?)
